**HIGH PERFORMANCE
RELEASE AGENTS
FOR ASPHALT**

RELEASE AGENT

BIOPAV 100 is a highly effective and versatile release agent for heavy equipment and hand tools. Outstanding performance on all types of asphalt mixes, including polymers. Specifically formulated for use on rubber tire rollers, shuttle buggy bins, paver bins, hot boxes and hand tools. One of the most cost effective, ecological and environmentally friendly alternatives on the market. BIOPAV 100 is designed to replace all types of release agents including diesel.

BIOPAV 100 is the alternative to diesel in all paving applications.

USE

- Rubber tire rollers
- Shuttle buggy bins
- Paver bins
- Hot boxes
- Hand tools
- Truck boxes

HIGH-PERFORMANCE

- Ultra-effective over extended periods
- Can be used in cold weather (Will work down to -15°C)

COST-EFFECTIVE

- Less expensive than competing products
- Full-strength formula, contains no fillers

ECO-FRIENDLY

- Made from totally organic and sustainable materials
- Does not contain any petroleum products

BIODEGRADABLE

- > 60% in 28 days (OECD 301B Standard)

SAFE

- Users
- Equipment
- Environment

FORMAT

- 20 L
- 205 L
- 1000 L

RELEASE AGENT

BIOPAV 20S is a release agent for truck boxes and rubber tire rollers. Once applied, it will form a thin protective film that will prevent asphalt from sticking and building up in truck boxes and on rubber tire rollers. Truck boxes will also be easier to unload. For truck boxes, apply at the asphalt plant before loading or on the job site after unloading. For rubber tire rollers apply at regular intervals with the integrated spray system. Should be diluted with water, the mix ratio depends on the asphalt mix. BIOPAV 20S will not breakdown asphalt and is safe on rubber, plastic and painted surfaces.

FEATURES

- Government approved as an alternative to diesel
- No negative effects on rubber, plastic and paint

USE

As a preventive measures in truck boxes when loading the following products:

- Asphalt/bitumen
- Clay and loam
- Sand
- Soil
- Aggregate

HIGH-PERFORMANCE

- Minimal quantity effective on treated surfaces
- Also effective with polymers
- Can be diluted in water

COST-EFFECTIVE

- Our most affordable version
- High volume pricing available

ECO-FRIENDLY

- Made from totally organic and sustainable materials
- Does not contain any petroleum products

BIODEGRADABLE

- > 60% in 28 days (OECD 301B Standard)

SAFE

- Users
- Equipment
- Environment

FORMAT

- 20 L
- 205 L
- 1000 L

HEAVY DUTY PAVING EQUIPMENT CLEANER

BIOPAV 1000 is a powerful bitumen stripper. It effectively removes accumulated bitumen or tar residues as well as sticky deposits.

BIOPAV 1000 is an excellent alternative to conventional, orange-based terpenes, with superior performance properties and a lower usage cost.

FEATURES

- NON-FLAMMABLE

USE

- Large-scale cleaning work

HIGH-PERFORMANCE

- High Performance formula outperforms competitive products
- Easy to apply

COST-EFFECTIVE

- Lower usage cost than competitive products
- Stable price structure with few fluctuations

ECO-FRIENDLY

- Made from totally organic and sustainable materials
- Does not contain any petroleum products

BIODEGRADABLE

- > 60 % in 28 days (OECD 301B Standard)

SAFE
